Query	DB	Op.	Plur.	Thes.	Date
((lambda or attB or attL or attR or attP) same (integration or insertion or recombination))	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
((lambda or attB or attL or attR or attP) same (integration or insertion or recombination)) same bait	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
((lambda or attB or attL or attR or attP) same (integration or insertion or recombination) same bait) and activation near domain	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
((lambda or attB or attL or attR or attP) same (integration or insertion or recombination)) and one near hybris	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
((lambda or attB or attL or attR or attP) same (integration or insertion or recombination)) and one near hybrid	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
((lambda or attB or attL or attR or attP) same (integration or insertion or recombination) and one near hybrid) and fusion near protein	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
((lambda or attB or attL or attR or attP) same (integration or insertion or recombination) and one near hybrid and fusion near protein) and reporter	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
((lambda or attB or attL or attR or attP) same (integration or insertion or recombination) and one near hybrid and fusion near protein and reporter) and yeast	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
((lambda or attB or attL or attR or attP) same (integration or insertion or recombination) and one near hybrid) and fusion near protein same (activation near domain or transcription near	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009

factor)					
(lambda or attB or attL or attR or attP) same (integration or insertion or recombination) same reporter	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
(lambda or attB or attL or attR or attP) with flank\$ with reporter same integrat\$	PGPB, USPT, USOC, EPAB, JPAB, DWPI	AND	YES		12-01-2009
